HUAWEI

In the 5.5G Era, Huawei introduced innovative infrastructure solutions for industry digitalization, customizing technology for specific scenarios. Industry stakeholders gathered to explore future opportunities under the theme "Innovative Infrastructure to Unleash Digital," with a focus on driving innovation in the industry using connectivity, computing, and cloud technologies.

PING AN TECHNOLOGY

A global tech leader, owns 46,000+ patents in AI, fintech, and digital healthcare – a world first. As the core tech arm of Ping An Group, it leverages AI, cloud tech, and more to power vital platforms for finance, healthcare, autos, real estate, and smart cities, driven by "Technology Changes Life" and aiming to lead in "AI+Cloud" solutions worldwide.

EHANG

Shaping Urban Air Mobility with cutting-edge flight technologies for intelligent urban transformation. Leading the way in UAV innovation and global UAM solutions, we are at the forefront of this emerging industry, providing efficient and eco-friendly 3D transportation for future cities.

BRIGHT DREAM ROBOTICS

Leading in Industrial Automation, Machinery Manufacturing, and Real Estate Services. We specialize in intelligent construction solutions, innovating with construction robots, BIM digitalization, and new construction industrialization. Revolutionizing the industry through technology and model innovation for sustainable development.

XAG - SMART AGRICULTURE SOLUTIONS

XAG: Global leader in UAS R&D and smart farming solutions. Revolutionizing agriculture with cutting-edge tech for plant protection, crop monitoring, and farm management. Pioneering sustainable innovation worldwide.

GREAT POWER ENERGY AND TECHNOLOGY

A Chinese lithium battery manufacturer specializing in green and high-performance portable batteries used in electronic devices, electric toys, hybrid electric vehicles, medical instruments, electronic security equipment, intelligent instruments, and energy storage.
